PROFILE

B.Tech graduate in Artificial Intelligence & Data Science with hands-on internship experience in software development and software testing. Proficient in Python, SQL, and Dart, with knowledge of Data Analytics, Machine Learning, Deep Learning, and Computer Vision. Passionate about developing scalable software solutions and leveraging data to solve real-world problems.

EDUCATION

B.Tech — Artificial Intelligence & Data Science	2022 – 2026
E.G.S. Pillay Engineering College, Nagapattinam — CGPA: 8.13	
Higher Secondary Certificate (HSC)	2022
Government Higher Secondary School, Sikkal — 82%	
Secondary School Leaving Certificate (SSLC)	2020
E.G.S. Pillay Matriculation School, Nagapattinam — 69%	

INTERNSHIP EXPERIENCE

AI Intern Lavendal Consulting	May 2025 – December 2025
- Developed and delivered 10+ production-ready features including AI-powered modules for the LUVA mobile application using Flutter and Dart across multiple Agile sprint cycles. - Collaborated with cross-functional teams in an Agile environment, participating in sprint planning, code reviews, and feature discussions. - Developed responsive UI screens and integrated REST APIs to support end-to-end application workflows and seamless backend communication.	
AI Intern Aazeero Software Labs	January 2026 – June 2026
- Developed and tested AI-integrated mobile application modules across LUVA and Digidine using Flutter, ensuring functionality and quality across multiple application workflows. - Executed 100+ functional, regression, and integration test cases to validate application functionality and software reliability. - Identified, documented, and tracked 20+ software defects through the complete defect lifecycle, collaborating with developers to verify resolutions.	

PROJECT

GAN-Enhanced Plant Disease Detection & Treatment Suggestion System

Technologies: Python, Streamlit, GAN, CNN, scikit-learn, OpenCV, Machine Learning, Deep Learning, Computer Vision

- Built a full-stack deep learning web app using Streamlit and GANs to detect plant diseases from leaf images across multiple disease classes and recommend targeted treatment remedies.
- Designed an end-to-end ML pipeline covering dataset collection, image preprocessing, GAN-based data augmentation to expand training data, and CNN model design with hyperparameter tuning.
- Evaluated model performance using confusion matrices and accuracy metrics, then deployed the application — demonstrating skills in computer vision, model deployment, and secure application development.

SKILLS

Languages: Python, SQL, Dart

Tools: Power BI, Git, Github

Soft Skills: Problem Solving, Communication, Team Collaboration

CERTIFICATIONS

- Responsible & Safe AI Systems — NPTEL
- Statistical Learning for Reliability Analysis — NPTEL
- Machine Learning Onramp — MathWorks
- GenAI Powered Data Analytics Job Simulation — Forage
- Data Engineering Professional — RapidMiner
- Python for Beginners — Python Institute
- Getting Started with Artificial Intelligence — IBM SkillsBuild
